## OIL & GAS SUPPLY PORTFOLIO

 : [www.sbs-eng.com](http://www.sbs-eng.com)

Strategic sourcing, engineering,  
and technical services for oil &  
gas operations.

---

Engineering, procurement, and technical support for  
refineries, petrochemical plants, pipelines, and  
energy infrastructure.

# CORE CAPABILITIES

## Pipeline & Flowline Construction

### Capabilities:

- Trench excavation & route preparation
- Welding, coating & NDT inspection
- Valve stations & pigging facilities
- Hydrostatic testing and commissioning

## Process Units & Industrial Facilities

### Scope Includes:

- Equipment erection (pumps, compressors, separators)
- Piping fabrication & installation (carbon steel & alloy)
- Structural steel erection
- Utility & service lines installation

## Storage Tanks & Pressure Vessels

### Capabilities:

- API-650 storage tanks
- Pressure vessels & spheres
- Tank foundation & civil works
- Hydrostatic testing & certification

## Mechanical, Electrical & Instrumentation Works

### Scope Includes:

- Mechanical erection & alignment
- Electrical cabling, switchgear, panels
- Instrumentation calibration & loop checking
- Firefighting & safety systems installation

## Pre-Commissioning & Commissioning

### Activities:

- Flushing, blowing, cleaning
- Functional testing
- Control system verification
- Equipment startup assistance

## Maintenance & Overhaul Services

### Activities:

- Mechanical repair & component replacement
- Rotating equipment overhaul
- Inspection & integrity evaluation
- Emergency maintenance support
